Understanding the Fundamentals: Setting Up Your Company

Before you even think about engaging the enemy, you need a solid foundation. This section of our Lethal Company walkthrough focuses on the crucial initial steps:

Choosing your starting location: The map in Lethal Company is diverse, presenting different challenges and opportunities. Carefully consider the terrain, resource availability, and proximity to potential threats when making your initial location choice. A seemingly safe spot might lack essential resources, hindering your early development. Conversely, a resource-rich area could attract unwanted attention from rival factions.

Recruiting and training your operatives: Your team is your lifeblood in Lethal Company. Don't just grab the first recruits you find. Carefully assess their skills and attributes. Specialization is key. Do you need more firepower, stealth experts, or tech-savvy individuals? Balance your team strategically to address various mission objectives effectively. Regular training is also paramount – keeping your operatives sharp is vital for survival.

Resource management: Lethal Company is a game of resource management. You need to constantly balance income with expenditures. Early on, focus on securing reliable income streams while strategically investing in upgrades that boost your operative's abilities and unlock new technologies. Wasteful spending can quickly lead to your downfall.

Mastering the Missions: Tactical Strategies for Success

Each mission in Lethal Company presents a unique set of challenges. Successfully completing them requires careful planning and tactical execution. This part of our Lethal Company walkthrough covers key strategies:

Intelligence gathering: Never underestimate the power of recon. Before launching a mission, gather as much intelligence as possible. Use available tools and operatives to scout the target area, identifying enemy positions, patrol routes, and potential vulnerabilities. A well-informed assault is far more likely to succeed than a reckless charge.

Choosing the right operatives: Not every operative is suited for every mission. Match your team's skills to the task at hand. A stealth mission requires operatives with high stealth ratings, while a direct assault might demand heavy firepower. Consider using support operatives to provide crucial buffs and tactical advantages.

Utilizing the environment: Lethal Company's environments are not just backdrops; they're interactive components of the gameplay. Use cover effectively, exploit blind spots, and utilize the terrain to your advantage. A well-placed ambush can turn the tide of even the most challenging mission.

Adapting to changing circumstances: Things rarely go according to plan in Lethal Company. Be prepared to adapt to

unexpected situations. Remain flexible and adjust your strategy based on the unfolding circumstances. Rigid adherence to a plan can be detrimental when facing unexpected enemy movements or environmental hazards.
